

MILK-Maker

HIGH ENERGY FEED PELLET

Feed Pellets designed to optimise milk production
to meet your profit targets.

MILK-Maker is a grain based, energy dense (high ME) feed, designed to maximise milk production throughout lactation. MILK-Maker has been specifically formulated to be used in conjunction with your high quality pasture and on-farm feed sources in order to increase appetite and enhance milk production.

What are the benefits of using MILK-Maker?

Spring / Early-Lactation:

In early lactation cows energy requirements are higher than what can be physically eaten, hence it is vital to provide cows with a very energy dense ration. The early lactation period is when you determine what peak milk production each cow in your herd will achieve so it is critical that the cow consumes as much energy as possible during this period in order to maximise her peak production.

Autumn / Late-Lactation:

During late lactation, the focus needs to be on replenishing cows reserves that have been utilised in early lactation. Energy needs to be supplied to begin improving cows body condition scores in order to set them up for the dry period following lactation.

Summer / Mid-Lactation:

Mid lactation begins when the Dry Matter intake of the cow peaks at 12-14 weeks post calving and when her energy supply exceeds demand (positive energy balance). The pasture quality changes with the onset of the seed head. This results in lower protein levels in the grass and milk production begins to decline. It is important to have a high protein concentrate to shallow the rate of decline.

Specifications (Typical analysis) for MILK-Maker?

	DM (%)	NDF (%DM)	ME MJ/kg DM	CP (%DM)	STA (%DM)	DOMD (%)
Milk-Maker	85	10.7	14.4	12	57	91

Key:

DM Dry Matter
CP Crude Protein
STA Starch

NDF Neutral Detergent Fibre
DOMD Digestibility of Organic Matter in Dry Matter
ME Metabolisable Energy

MILK-Maker also contains a full range of macro and micro (trace) minerals.

Methods for feeding MILK-Maker:

To ensure minimum wastage, Milk-Maker should ideally be fed through an in-shed grain or meal feeding system to ensure accurate feed rates have been administered.

If you have any queries regarding your feeding system, it is recommended that you consult your Ruminant Nutritionist.

Recommended feeding rates for MILK-Maker

PRODUCT	FEED RATE (KG/COW/DAY)
MILK-MAKER	3.0 KG

Why use MILK-Maker?

To ensure your herd maximises milk production, resulting in increased milk revenue and maximum profitability.

MILK-Maker FOR ANIMAL USE ONLY

- Not suitable as a feed product for other than lactating dairy cows.
- Do not allow dogs, horses or other equines access to feeds.
- Store in cool, dry place out of direct sunlight.

Ingredients Selected From:

Barley, Canola Meal, Maize, Lime flour, Magnesium Oxide, Mineral Premix (Cobalt, Copper, Iodine, Manganese, Selenium, Zinc), Molasses, Chromium, Peas, Salt, Sodium Bicarbonate, Wheat, Wheat Bran
